

ENVIRONMENT POLICY

OneSteel's primary operations include mining, metal recycling, steelmaking, the manufacture of intermediate and finished steel products, and the distribution and sale of metal and mineral products.

OneSteel seeks to improve business sustainability by valuing environmental, social and economic considerations in its decision-making.

OneSteel is committed to pursuing a high standard of environmental management throughout its global operations. OneSteel strives for continual improvement of environmental performance, the efficient use of resources, and the minimisation or prevention of pollution.

Specifically, it is OneSteel's policy to:

Establish, review, document and monitor, measurable environmental objectives and targets to continually improve environmental performance. Taking into account evolving community expectations, management practices, scientific knowledge, technology and business structure.

Use energy, fresh water and other resources more efficiently where economically viable. This includes scrap metal recovery and recycling, and the promotion of and improvement to the environmental credentials of OneSteel, its operations, its products and their application.

Comply with applicable environmental laws, regulations and mandatory standards. Where these do not exist, apply appropriate internal standards that reflect OneSteel's commitment to prevent or minimise adverse environmental impacts resulting from its operations, products and services.

Communicate on environmental issues with relevant governments and communities directly affected by OneSteel's operations, and contribute to the development of policies, legislation and regulations that may affect OneSteel and its operations.

Control and manage environmental risks arising from OneSteel's operations by implementing systems to identify, assess, control, and monitor those environmental risks.

Educate and appropriately train employees, contractors and labour hire employees to assist with OneSteel's environmental standards understanding and assignment of appropriate accountabilities and responsibilities to those individuals.

Inform relevant employees, contractors and suppliers of goods and services to OneSteel managed sites of their obligations regarding this policy, to manage policy implementation, facilitate stakeholder understanding and be committed to continual policy maintenance and improvement.
